RentalConnect

Rental Fleet Control and Safety by SmarTruck

Smart and connected SmarTruck package for Material Handling Equipment rental companies

SmarTruck RentalConnect brings total fleet visibility and remote control to truck rental companies, while delivering automatic, value-added productivity and safety benefits to their customers.

Challenges Rental Companies Face

- ✗ Limited visibility into **where the trucks actually are**
- ✗ Limited ability to ensure **safe, compliant, and accountable use**
- ✗ Limited ability to detect **damage, impacts, and abuse**
- ✗ Limited tools to track operating **hours and proper maintenance**
- ✗ Limited ability to enforce **duration or usage limits** on the truck

Advantages RentalConnect Provides

- ✓ **Real-time fleet visibility** and GPS/cellular tracking
- ✓ **Remote operation monitoring,** safety features, and authentication
- ✓ Instant impact detection with **detailed incident records**
- ✓ **Automated maintenance scheduling** with hour-based alerts
- ✓ **Contract-level assignment**, remote lockouts, and usage-based billing

SmarTruck is an industry-grade productivity and safety platform, deployed across fleets in the US and Europe. SmarTruck delivers real-time insights, strengthens safety compliance, and boosts efficiency.

Building on customer feedback and our fleet management expertise, we are introducing RentalConnect – a SmarTruck package tailored specifically for truck rental companies and their customers.

Value for rental companies

RentalConnect turns every truck into a connected and manageable rental asset – from anywhere.

Total fleet visibility

- Find My Truck: real-time GPS/cell tracking
- Fleet map with live status dashboard
- All trucks in one platform, any make/model

Maintenance management

- Accurate online operating-hour tracking
- Time- or hour-based maintenance plans
- Automatic alerts before service deadlines

Remote fleet control

- Remote lockouts for service, payments, unauthorized use, or overdue mantenance
- All remote actions logged for accountability

Incident documentation

- Every impact recorded with timestamp, operator, and customer
- Supports insurance claims and disputes

Contract & assignment management

- Assign trucks and track rental periods
- Automatic lockouts at contract end
- Usage-based billing by operating hours

Better asset utilization

- Identify idle units at customer sites
- Detect abuse with high impact counts
- Highlight high-use, low-incident customers

Value for their customers

Instant value for customers of any rental length. No installation. No infrastructure. All included.

Operator authentication

- Trucks start only with card-based ID
- Blocks untrained or unauthorized operators
- Operator logs improve accountability

Collision detection

- Onboard sensors detect impacts instantly
- Alerts for supervisors or managers
- Incidents logged for review and reports

Safety inspection

- Digital pre-operation checklist required
- Truck stays locked until completed
- Timestamp and operator ID logged

Truck tracking

- Find My Truck: real-time GPS/cell tracking
- Simple map-based dashboard
- Ideal for multi-site or large facilities

Utilization reports

- Clear usage patterns and peak periods
- Spot availability gaps and bottlenecks
- Justify fleet size and resource needs

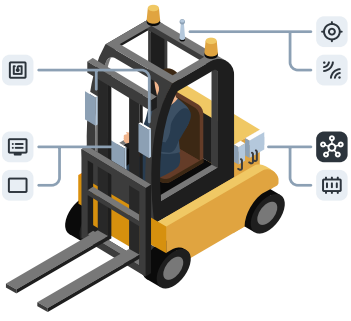

Rental reports

- Daily, weekly, end-of-rental summaries
- Usage graphs, incident and checklist log
- Useful for audits and cost allocation

How it works

SmarTruck is built on modular hardware components that can be retrofitted onto any type of truck – perfect for heterogeneous fleets. At the core of the system is the ConnectBox, which manages all data processing, communication, and positioning.

Once installed, the system operates fully online and requires no local infrastructure or facility-level setup. Rental customers receive access to SmarTruck features automatically, without any additional onboarding.
